

状态:	Storytelling:Automation	开始日期:	十二月 30, 2022
优先级:	普通	计划完成日期:	
指派给:		% 完成:	60%
类别:		预期时间:	0.00 小时
目标版本:	未来工厂转型		
关联联系人:			

描述
与朋友多次就这个话题做过探讨

<https://support.microsoft.com/en-us/office/all-about-approval-workflows-078c5a89-821f-44a9-9530-40bb34f9f742>

Workflows vs Business Processes

A sequence of tasks that processes a set of data or finish a task vs The workflow, form, collected data, assignees, and all other parts that make a process flow

Are created by listing out steps and tasks vs Must consider a much broader set of actors, data, reports, and business impact

Focuses on moving a task to completion vs Focuses on achieving a key business goal

Tactical vs Strategic

Differences between workflow and processes

We ' ve put together a small summary of topics that show some interesting contrasts between workflow and processes. Read on to better understand the difference between these two concepts:

- Process is a sequence of tasks, workflow is a way to make this sequence more productive and efficient
- Process is something that exists naturally and flows intuitively. A workflow is analyzed, planned, modeled and automated consciously and with well-defined purposes
- Process is the way a team coordinates and communicates to deliver a result. Workflow is a technology or tool that can help to do achieve this result in the best way.
- Not every process is automated, the goal of workflow software is actually to automate processes
- Workflow is a consequence of the existence of processes, so it ' s possible for a process to exist without workflow. Conversely a workflow cannot exist without the corresponding process.
